

FLSB DEPARTMENT  
PRESENTS  
"VIRUSES IN NEWS"

## COME AND EXPLORE THE CRAZY WORLD OF INCREDIBLE VIRUSES

- Invisible yet invincible !! A complete tour to HIV detection and treatment
- Zika RNA's longer persistence in semen than other fluid with shorter transmission & farther transmits HIV to newborn - how it happens??
- Scientist discover how Nipah enter cells
- Virus weakness into spotlight : Ebola virus infection
- Norovirus: A highly contagious virus spreading in nursing homes, schools and densely populated spaces
- Obesity may also impact flu transmission, not just severity illness
- Novel drug delivery beats swine Flu at gene level (H1N1)
- "Hush little virus, Don't say a word: how scientist investigate sleeping viruses"
- Adenoviral vector with shield and adapter increase tumor specificity and escapes liver
- Evidence that addictive behaviours have strong links with ancient retroviral infection
- Fighting fire with fire: killing bacteria with viruses
- Cancer killing potential of zika virus
- HHV : Journey from mouth to brain and womb
- Viruses in your brain might also bug your bowels
- Are the ancient ghost in our genome, the retrovirus, our hidden killers? Or making us smarter and more intelligent
